

**A structured and proactive response to your organization's cost reporting obligations helps mitigate risk, ensure compliance, and maximize future reimbursement.**

## Why CRI?

Cost reports have long been part of the regulatory landscape of healthcare as a fundamental component of payer rate setting, compliance, and cost monitoring. Notwithstanding improvements in technology and evolving reimbursement principles, cost reporting will remain an ongoing and vital component of healthcare reimbursement for years ahead. Our cost reporting perspective utilizes the cost report as a diagnostic tool to identify both risks and opportunities. Your cost report contains a treasure trove of valuable information and indicators that our trained staff translate into actionable opportunities.

CRI's healthcare professionals have considerable experience and expertise in assisting our clients in meeting compliance requirements and developing best-in-class processes to enhance reimbursement opportunities. Among other services, our professionals help with:

- Medicare & Medicaid annual cost reports (all types)
- Third-party payer cost reporting
- Medicaid supplemental payment programs, including DSH surveys
- Assistance with cost report desk reviews and audits\*

We provide value-added services in addition to meeting compliance reporting requirements to healthcare providers of all types and sizes, designed to meet expectations in the current environment and prepare for challenges ahead.
